

V11.04 – 15 Sep 2011

1. Update code for compatibility with Office 2007 and 2010
2. Added code to check for duplicates in Agencies and Reasons table
3. Updated and re-enabled Summary reports
4. Misc little fixes to code

v11.02 – 10 Sep 2011

1. Milestone export now allows selection of output folder (defaults to My Documents)
2. Milestone dates automatically adjusted for current year
3. Program version appears on main menu before data file connected
4. Ethnicities checked prior to Milestone export and if empty set to U (Unknown)
5. Year levels updated prior to Milestone export
6. New referral puts cursor in date field for easy entry
7. Log file records data file connections for troubleshooting purposes
8. Reports list updated to only show active reports
9. New report giving Export of Referrals by Officer / School / Name
10. Referrals by School report fixed to show multiple referral types including Referral by Other
11. Double click on Program or Datafile path opens the folder
12. Info Request adds in level date if missing (to avoid error when loading info request form)
13. On Schools screen, holding Ctrl key while clicking School Number lookup opens full NZ Schools list
14. Backup checks that required zip component exists
15. Backup uses same name as that of data file to allow for easier restores
16. Windows Version and Access Version included in diagnostic info
17. Registration codes updated to make them easier to enter (for humans)
18. Fixed a problem where /s in DTS name invalid SS name
19. Fixed issue where NSN report was ignoring date range
20. Fixed issue where different Truancy Service name appeared on main menu prior to connection of data file

v11.01 – 7 June 2011

1. New version numbering

V5.06 – 27 May 2010

1. New Registration code required from 22 July 2010
2. Milestone Export is now enabled
3. On Students screen, Show '2010' button shows students with events in the current year
4. On Students screen, Show Open button shows students with open referrals
5. On Students screen, events list background turns green if student has open referral(s)

V5.05 - 18 May 2010

1. 'Other Reasons' fields locked until Stated or Proposed reason set to 'Other'
2. When saving a referral there is now a check on the length of Other Reasons and Other Agency fields
3. New button on Reports form to allow easy setting of Milestone/Term date ranges
4. Open Referrals are marked (with 'O' marker) on student/event lists
5. School Numbers table has been incorporated into database instead of separate XLS
6. After someone runs a new setup file, it's automatically copied to the data dir for other users
7. Check for new setup file in data dir happens immediately upon opening db
8. Improved code used by school MoE number search
9. Increased size of 'Comments to MoE' field (Memo=unlimited) and added copy details button

V5.04 – 2 May 2010

1. Delete Event button added to Students and Schools screens
2. When newly downloaded version of setup is detected in data file folder, database will close if user chooses to run the new setup.

V5.03 – 26 April 2010

1. Added Report of Student NSNs
2. Font size on Student History increased from 8 to 10 for better readability
3. Update Agencies and Reasons table with any missing records

4. Convert 'non enrolled' referrals to 'enrolled' equivalents

V5.02 – 30 March 2010

1. Added logging of data file connections and changes

V5.01 – 28 March 2010

1. Updated to handle new Milestone format (now a data export instead of a report)

V4.18 5/6/09

1. Bug fixed in MoE Milestone which produced an error message when printing (caused by issues in multiple referrals)
2. Code updated to show data file connection progress
3. Code added offer running of new version setup file downloaded to data file folder

V4.17 9/4/09

1. Code updated to warn of using old program versions on newer data file.
2. Code updated to warn if students Gender has not been set (when running Milestone).
3. Code updated so that students with no Gender are counted as F in section 2 of the Milestone (breakdown by gender and ethnicity).
4. Bug fixed in MoE Milestone where Secondary Schools contacted was coming out as 0.

V4.16 31/1/09

5. Milestone dates updated for 2009

V4.15 1/7/08

1. Code for Milestone modified to fix minor bug that occurs under certain circumstances when counting secondary schools
2. Fix milestone report field for Community Pacifica Total

V4.14 20/2/08

6. Milestone dates updated for 2008
7. Backup routine updated to correctly handle UNC pathnames and hidden shares

V4.13 29/10/07

8. Archive Students button renamed to Remove Students and issue fixed with incorrect handling of dates.
9. New Patrol button has been removed from the Main Menu.
10. Service Name now appears in tile on taskbar.
11. On start up a check is made to see if data file exists.
12. Database can now access newer versions of data file (useful if reverting after trial of newer database).
13. Check for Updates button added to Main Menu to allow easy checking for new updates via website.
14. Event Types can now be marked as Active (or not) on Event Types screen so they can be 'hidden' from selection when entering new events.
15. The Access 97 version of the database has been retired and will no longer be updated

V4.12 9/8/07

1. Milestone report fixed so that the list of students with multiple referrals now shows up in report
2. When database starts, the number of schools, students, events are cleared until a data file is connected
3. Event entry time check is fixed so that the message correctly says time must be in range 7am to 5pm
4. Backup process updated to correctly handle folder names with spaces
5. Diagnostics process updated to correctly handle folder names with spaces
6. Diagnostics process updated to include Module references
7. Diagnostics process updated to give choice to scan C: for data files (to improve speed)
8. Date when V4 registration required has been extended to 10 Sep 2007

V4.11 25/6/07

1. Milestone Filter button on Students screen allows filtering on MoE Milestone field for Milestone troubleshooting purposes.
2. Milestone field on Students form renamed MoE Milestone.

3. Bug fixed where Moe Milestone field was cleared after running Milestone report.
4. Events list now highlights Referrals with **
5. "Picked up by Chance" changed to "Referral by Other (Picked up by Chance)" to agree with Milestone.
6. Warning message appears in Event Entry screen if times outside 07:00 to 17:00 are entered.
7. Student search box now accepts single quote in names (eg O'Brien).
8. Backup command now runs correctly with spaces in Data file and Backup file names. Zip file no longer includes folder name making unzips to alternative locations possible.

V4.10 19/6/2007

1. Milestone code has been updated to produce new 2007 data.
2. Milestone dates (Configuration) updated for 2007.
3. Milestone dates (Configuration) are now only used as default on Reports screen, not as source for Milestone calculations. This allows the date range to be changed to suit the users purposes.
4. Student Milestone field codes have been updated to reflect 2007 Milestone and the referral and reports code include the number of referrals and reports from each source.
5. Student Milestone field is now updated using entire year date range when you add/edit/delete events. When the Milestone report is run however, the student Milestone field will be updated with the allocations of the actual Milestone date range used.
6. Minor changes to layout of main screen
7. Backup button on main menu screen creates zip backups of the data file in a 'backup' folder within the data folder. At completion of backup, the option is given to open the backup folder.
8. Journals report now includes duration hours with the total at the end of the report (for those wishing to or required to keep track of the time spent on 'other' activities).
9. New Students List – Events in Date Range, allowing you to print a students list made of only those students with events in the specified date range (eg using the date range 1/1/07 to 31/12/07 will list students who have been dealt with this in 2007 only).
10. Diagnostics code now includes subdirectories of Program and Data folders. The diagnostic process also displays progress messages to keep the user informed.

V3.07c 7/5/2006

1. Milestone dates for 2006 have been built in with buttons on Milestone Dates form to select
2. If user enters a date beyond second milestone date, message about changing dates
3. Before reports are run, events in the future must be fixed
4. Before milestone data is calculated, events in the future must be fixed
5. Registration code updated so that Trial Mode uses a registration code with expiry date at end of DTS name
6. Reports can only be printed in registered version of database

V3.07b 2/5/2006

1. Section 1 Reasons Reported: Un-needed figures removed from under Community and Other.
2. Section 2 Comments on Reasons Reported: Report modified to show only Advised School events (it was too long otherwise)
3. Section 1 Students Responded To: A single response following two referrals from different sources now counts as both being responded to
4. Section 1 Students Responded To: Where events have the same date/time, any referral is counted before any other types of events, so that a referral and subsequent response count in this section. The problem occurred in some cases where a referral and response with exactly the same date/time were in the wrong order so the referral came after the response.
5. Section 2 Comments reports: minor fixes to spelling

V3.07a 28/4/2006

1. Code to produce 2006 milestone data directly into each student as events are entered
2. Fix Edit event so that original school id picked up (could be different than current school)

V3.06a 2/4/2006

1. Added new Event "Picked up by chance" (126) for data for new 2006 Milestone
2. Renamed Events "Referral by other than school" to "Referral by community"

V3.05a 6/11/2005

1. The Milestone now has the fully detailed gender and ethnic analysis as a separate page. Note that this comes up automatically as a separate report when previewing the Milestone.

2. When the Milestone is run the program performs checks for errors in the data that might affect the milestone. The program checks for orphaned events (events that are not attached to any students) and event dates in the future. Orphaned events are attached to a dummy student "Unknown" so they can be included in the Milestone if the dates are relevant. The program also checks for events which have dates in the future - it gives you the opportunity to print these so they can be fixed (the report of invalid event dates can also be printed from the Reports screen at any time).
3. All summary reports with a gender and ethnic analysis now include the more detailed format with Pacific Island ethnicities broken down into Samoan, Tongan, Cook Island, Niuean and Other Pacific.
4. The Reports menu now has a Help button - this button gives more detailed information about what is included in a report. Most differences are about whether a report focuses on the number of referrals or events (students with multiple referrals etc are counted multiple times), or whether the report focuses on the number of individual students (students with multiple referrals or events are only counted once).
5. The Reports menu now lists reports with a report number for ease of reference when referring to a report.
6. The report names have been updated in an attempt to make them more descriptive.
7. The report "List of All Students with Events" now prints the ethnicities in the order they appear on the gender and ethnic analysis reports i.e. NZE first, M second etc.
8. There have been some minor tidyups with the reports and the counting code behind them.
9. Until 21/12/05 this version will accept an old registration code or a new registration code. After 21/12/05 only a new registration code is valid.

V3.04d**V3.04b**

1. Updated report showing all students with ethnicity "To Be Determined" to include School fax and email and student caregiver and contact details.
2. Updated age based summaries to use age at first referral or event
3. Tidy up of other reports

V3.04a 29/6/05 5.25pm

1. Created report showing all students with ethnicity "To Be Determined"

V3.03d**V3.03c****V3.03b 29/6/05 5.25pm**

1. Fixed problem in MoE Data Milestone report where events on the last date were not counted.
2. Expanded date field on "Students List – All Events by Ethnicity and Gender" to allow showing full year if computers short date was set with YYYY.

V3.03 28/6/05 2.10pm

1. Updated Event Types report to be more compact
2. Added new Event Type "Meeting – DTS Committee" and updated MoE Milestone to include these meetings in Q12.
3. Renamed Event Type "meeting" to "Meeting – Other"
4. Updated report "Students List – All Events by Ethnicity and Gender" to show MoE Milestone questions for each student.

V3.02c 25/6/05 10.15pm

1. New report "Students List – All Events by Ethnicity and Gender" gives a list of all events in the date range specified for the MoE Milestone. Allows for checking what events each student has.
2. Fixed minor problem where students not attached to any school were being missed out of some reports. Link between Events table and Schools was set to only display matching records, needs to be set to display all records from Events regardless of school link.

V3.02b 8/6/05 11.05pm

1. Fixed problem in report "Student Summary – Total referrals by school" which had missing) in SQL in function RepReferralsSummary

2. Fixed layout problem with MoE Data Form below question 13, it reads "...further planning at the national" should read "...further planning at the national level." Expanded text box to allow wrapping to next line.
3. Fixed problem where Asians weren't being included in Q11 "Other" column

V3.02a 7/6/05

1. Updated report "Schools List – Full" to include School Type (PR/SE/CO/NS)
2. Updated report "Students List - First Referrals by Age Group" to use all students with referrals in the given date range.
3. Updated report "Students List - First Referrals by School" to show students names grouped by school (each school on its own page)

V3.00 Beta 3

1. MoE Data Form code updated so that Q7 (Outcomes) doesn't just look at referrals

V3.00

1. New format for MoE Data Form. First encounter and final outcome no longer required

V2.27 15/3/2001

1. Modification to main menu to display full path and version of both main database and data file.

V2.26

1. Reports screen changed to accommodate more numerous reports
2. New reports added which give gender/ethnicity breakdown of students where first encounter in a given date range or encounters in given date range.
3. Fixed bug that meant journal events for school not updated correctly on screen after editing existing event.

V2.25b

1. Problem fixed with registration codes which have leading 0's
2. Backup utility included

V2.25

1. Problem fixed where events in the Events dialog were sorted by the day part of the date rather than the full date

V2.24

1. Added code to increase CountedAs field in Students table to 255 (was 50) to avoid overflow error when students appearing in a number of questions on MoE Data Form
2. Journal Events dialog sort order changed to show latest at top
3. Students form altered so that events show latest at top
4. Journal Events report updated to show School/Agency in Event Type column rather than Notes column.
5. Record counts for Schools, Students and Events now displayed on main form
